

OCSInventory- guida installazione MAC

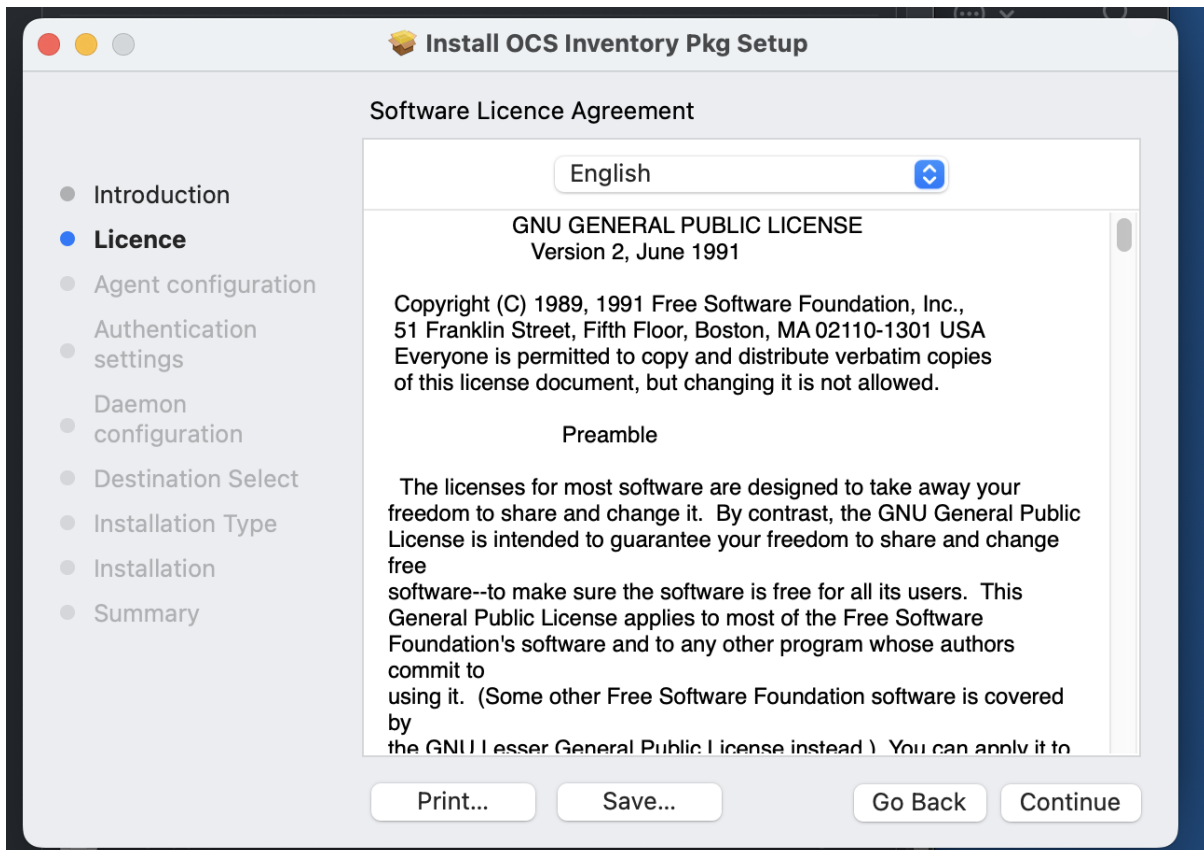

Installazione

- Scaricare l'installer [Ocsinventory Unix Agent-2.10.0-MAC.tar.gz](https://www.ocsinventory.org/docs/agent2100mac)
- Estrarre il programma e lanciarlo rimuovendo la protezione di default.
- Eseguire i seguenti passaggi

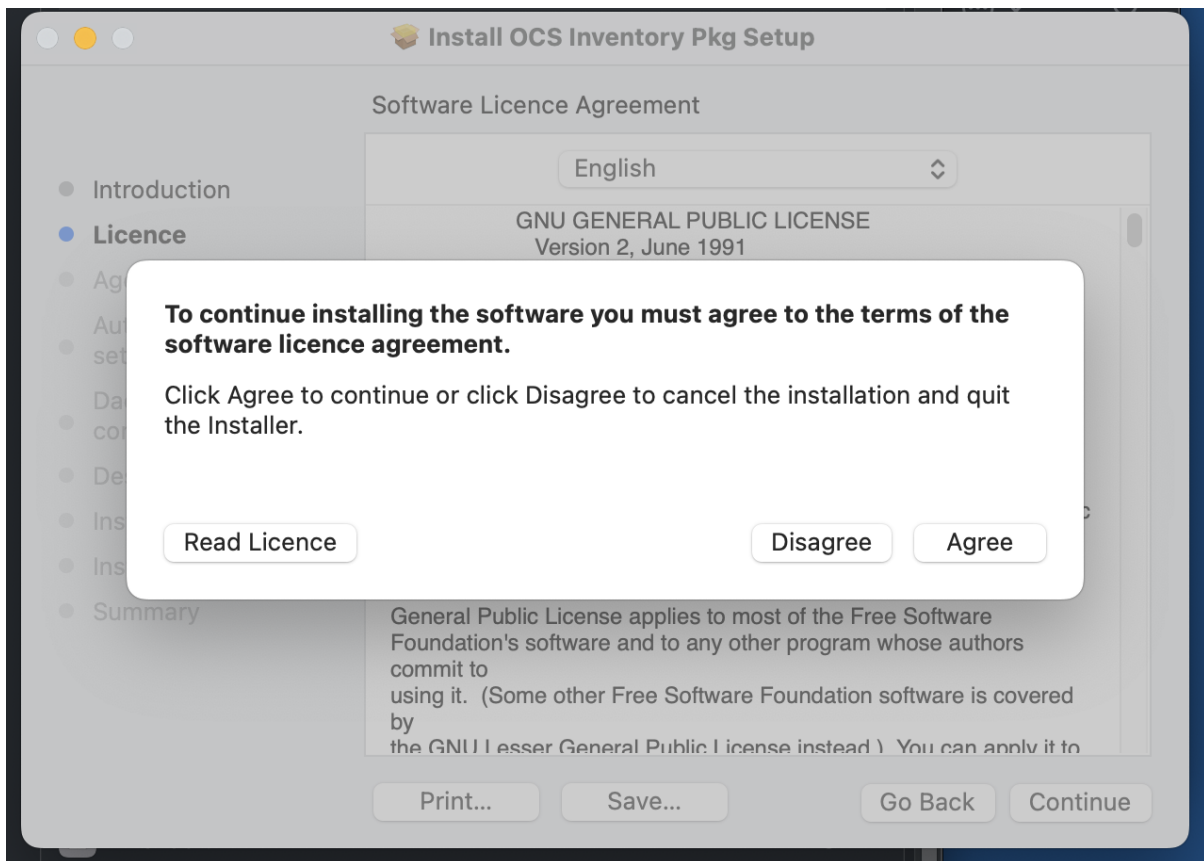

1 Cliccare su Continue

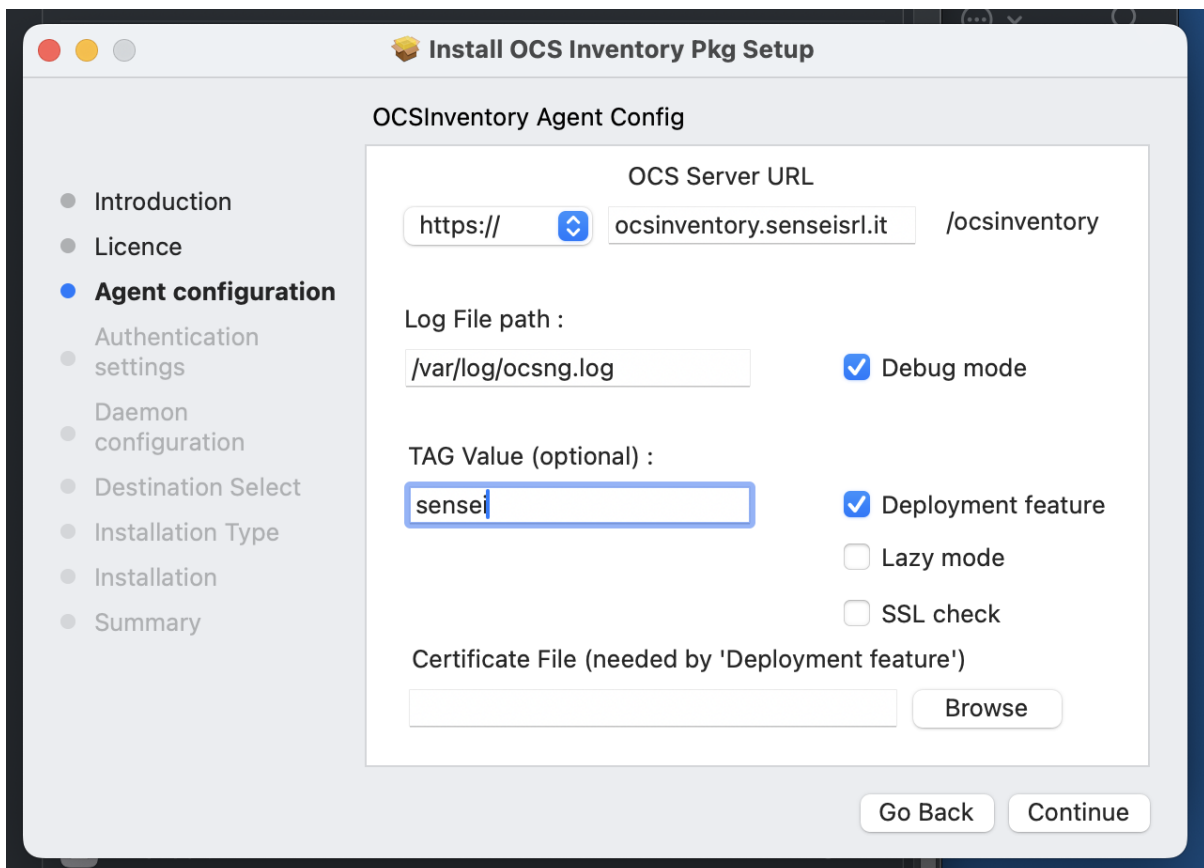

2 Cliccare su Continue

3 Cliccare su Agree

4 Compilare i campi del form come indicato e cliccare su Continue

5 Compilare i campi del form come indicato e cliccare su Continue

The screenshot shows the 'Install OCS Inventory Pkg Setup' window. On the left is a sidebar with a list of steps: Introduction, Licence, Agent configuration, **Authentication settings** (highlighted with a blue dot), Daemon configuration, Destination Select, Installation Type, Installation, and Summary. The main area is titled 'OCS Inventory Agent Config' and contains the 'Authentication settings' section. It has three input fields: 'Username :' with the value 'senseiuser', 'Password :' with the value '00221S3ns3!gm', and 'Realm :'. At the bottom right are 'Go Back' and 'Continue' buttons.

6 Compilare i campi del form come indicato (sono i default) e cliccare su Continue

The screenshot shows the 'Install OCS Inventory Pkg Setup' window. The sidebar on the left has the same list of steps, but 'Daemon configuration' is now highlighted with a blue dot. The main area is titled 'OCS agent daemon options'. It contains a label 'Launch OCS agent every' followed by a text input field with the value '5' and the text 'hour(s)'. Below this are two checked checkboxes: 'Launch OCS Agent at daemon start' and 'Launch daemon after install'. At the bottom right are 'Go Back' and 'Continue' buttons.

Install OCS Inventory Pkg Setup

OCS agent daemon options

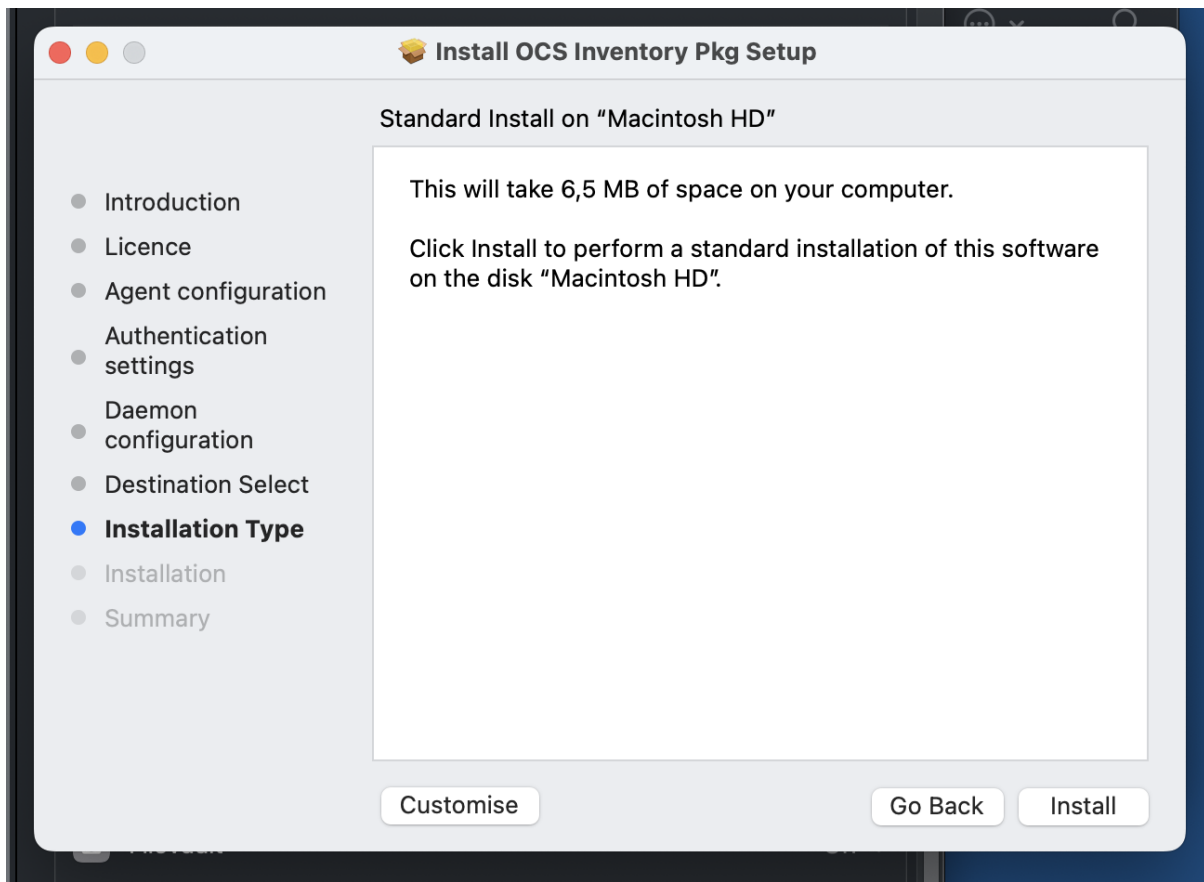

Launch OCS agent every 5 hour(s)

☒ Launch OCS Agent at daemon start

☒ Launch daemon after install
